ABOUT OUR PLANET

The Our Planet collection circumnavigates the world in 80 dreams of the best our planet has to offer. And, above all, don't start dreaming of another world. Here, the stars twinkle, the planets are aligned, there is a genuine plan to encompass the world. In places, the jungle seems to stretch out forever, the marine world rises to the surface and the forest is no longer scary. Over there, the dinosaurs are brought back to life, the tigers make eyes at us and the bears camp outdoors. We may be dreaming, but we are also learning: the planets and stars tell us their names, the animal drawings combined with small geometric patterns, nature rubs shoulders with the cosmos... all in a joyful and modern horn of plenty that is accessible to all.
