

## TECHNICAL DATA SHEET

# VERSACE 6

## Product Description

### Manufacturer

A.S. Création Tapeten AG  
Südstr. 47  
51645 Gummersbach  
www.as-creation.de

### Product Name

Versace 4

### Product Features / Components

- Versace 4 Collection products are manufactured from the following resources:
  - Backing material: 90 g/m<sup>2</sup> non-woven (certified according to FSC)
  - Coating: approx. 280 g/m<sup>2</sup> PVC-Plastisol (all components are REACH compliant)
    - PVC 30 – 65%
    - DINP 15 – 40%
    - CaCO<sub>3</sub> 0 – 20%
    - Pigments 0 – 25%
    - Additives 0 – 15%
    - Blowing Agents 0 – 5%
- Versace 4 Collection non-woven wallcoverings do not need soaking time and can be hung using paste-the-wall technique or with a pasting machine.
- Versace 4 Collection non-woven wallcoverings can be completely dry-stripped if the surface has been suitably prepared.
- Versace 4 Collection non-woven wallcoverings are:
  - Skin-friendly, because they do not contain glass fibres
  - Dimensionally stable - therefore no soaking time required
  - Crack-bridging
  - Permeable to steam
  - Heavy flammable according to EN 13501-1. Can be used in the commercial sector

### Technical Data

- Dimensions: wallcovering: 10.05 m x 0.70m; possible dimensional variations of + / - 3%
- Weight: ca 2,340 g – 2,670 g, depending on design, structure, composition and colour of the individual product
- Roll diameter: approx. 8.5 cm - 9 cm
- Hanging at 18°C and a relative humidity of 65% is ideal
- Drying time: 1-2 days, depending on the temperature, relative humidity and the base surface
- Permeable to steam according to DIN 53122 and DIN 52615
- In combination with mineral surfaces and non-combustible building panels it is flame-retardant according to EN 13501-1
- Rolls must be stored vertically in a dry, cool place
- Owing to batch production of wallpapers, only one fabrication can be processed in each area
